## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1,3,4,8-20,22-25,27-34,36,38-52,55,57-67,70-75 are allowable over the prior art of record.

2. The following is a statement of reasons for the indication of allowable subject matter:

As per the independent claims, the claim limitations pertaining to the specificity of the filtering characteristics applied to the voice signal, is not explicitly taught by the prior art of record.

With respect to the prior art of record, As per claim 5, Helf et al (5550924) teaches a voice communication device with possible noise corrupted signals (col. 1 lines 5-13) using a voice enhancer (col. 1 lines 5-25) with masking frequencies according to psychoacoustic aural curves (col. 4 lines 31-35); filtering the signal according to psychoacoustic aural information, and reading the filtered signal to the original signal to obtain a filtered speech signal (col. 3 lines 25-50, col. 4 lines 30-54); overlap/adding the filtered signal to the original signal to provide a noise-filtered signal (col. 4 line 40 – col. 5 line 38). Lin et al (5953697) teaches using the envelope gain/amplitude of the filter in the signal processing(col. 2 lines 43-49). However, none of the prior art of record explicitly teaches the specific filtering characteristics as spelled out in the claim limitations of the independent claims. Furthermore, it would not have been obvious to one of ordinary skill in the art of speech/audio amplification to modify the teachings of the prior

art of record at the time the invention was made to obtain the recited limitations pertaining to the claimed filtering characteristics in the independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
